(BS-8-SEM) FINAL YEAR PROJECTS EXHIBITION

43. Hospital Managment System

1. Abstract:

The hospital management system is a MERN stack web-based application that efficiently manages patient-doctor appointments and medical records, reducing manual work and improving operational efficiency by automating various tasks and streamlining administrative processes.

2. Problem Statement:

Manual process

Data Mismanagment

Security risk

Scheduling Issues

3. Objectives:

Proces Automation

Data secuirty

Efficient

Improved Healthcare
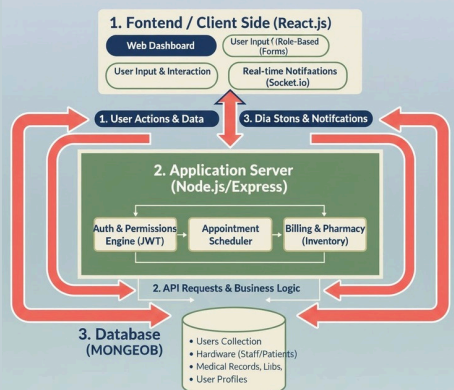

4. Main Features:

user Autentication

IPD

OPD

OPT

5. Tools & Technology:

React js

Node js

6. Block Diagram:

7. Methodology:

System Design

Database Design

dev and integration

Req Analysic

Deployment

Project Supervisor: Dr Fakhra Kashif

Group members: Saqib Haroon 30381

Project Coordinator: Dr. Furqan Shahid Assistant Professor CS DEPT. FUUAST-ISB

Project Developed for: FUUAST
